

# New to Second QUARTER!

## Introducing...Mighty Math Multipliers

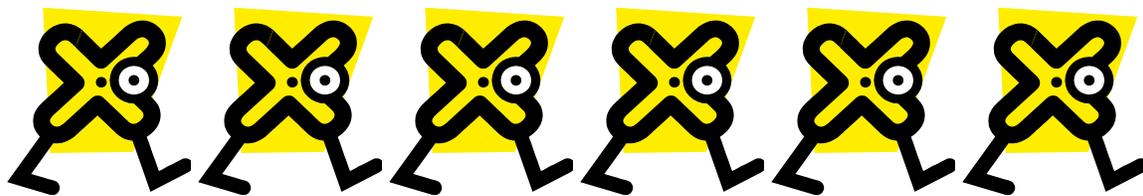

Here Ye! Here Ye! I've heard that all of you students want to be mighty multipliers. What's that, you ask? A mighty multiplier is a person who knows all of their multiplication facts....perfectly!

How is this exactly going to happen? Each of you will be on your own team while studying, learning, reviewing, and quizzing. Check it out below.

### Here's the drill...

1. When you enter the classroom each Monday morning, there will be a number of the day on the smart board. That number represents the multiplication fact that you will be studying and reviewing for the week.
2. As soon as you arrive, you will be responsible for reviewing that specific multiplication wrap-up. (For example: If the number of the day is 3, you will need to do the wrap-up twice and be sure to check it on the back.)
3. After completion of the wrap-up, you need to independently review what you've worked on. Each of you will have a multiplication sheet for that specific fact on your desk. Please do it and hand into Miss D's mailbox when complete.
4. The last and final part of this program is to take a timed quiz by the end of the day on that specific number. It will be done on the computer. Go to the following website:

[www.multiplication.com/quizzes.htm#MultFlashQuiz](http://www.multiplication.com/quizzes.htm#MultFlashQuiz). Please mark this as a favorite on the PC/iPad. That way it will be readily available for all of us. This quiz will be timed; it will be corrected by the website, and will need to be printed off. See example. You will need to do this ALL by the end of the day, or else you DO NOT gain the points.

Well...that's it!

Each WEEK will begin a new fact to study, learn, review, and quiz. Once we have all 12 tables and facts down, there will be TONS of classroom games to play. We will try to have weekly posts of individual's current scores.

GOOD LUCK!

MRS. BAKER
